

4 IR Cameras/4 Channel 250Gb HDD c/w CD/RW MPEG4 CCTV Camera Kit

ID: LY82-514-69A

A simple to install 4 channel digital system all in one box. 4 Cameras each with 20m cable, a network DVR complete with HDD and power supply. Have a professional system installed in less than 1 hour. Simply plug in the cables, connect to a monitor (monitor available at and extra cost), programme the DVR with the onscreen display, and the system is ready to record.

Access the images through a PC wherever you are in the world at whatever the time of day. Multiplex features mean you can record, and backup all at the same time. Take the worry and hassle out of CCTV installation with our range of kits.

- **All in one kit design** - Includes 1 MPEG4 network digital video recorder and 4 high quality cameras, suitable for professional surveillance, all cable and power supply included
- **Advanced MPEG4 Compression Format** - Provides clear, high quality images, saves the HDD storage capacity for longer recording hours
- **DIY Operation Available** - Clear installation instructions, entire installation only takes 30-60 minutes

- **Application for Day & Night Surveillance** - Professional surveillance system to give 24 hour protection, External alarm & audio-in supported to complete your security
- **Unified Power Source** - The power converter included supplies power for both the digital video recorder and the 4 cameras
- **Network Surveillance Supported** - Remote surveillance available via your PC with the licence software AP or IE browser, supports up to 5 on-line viewers simultaneously

4ch MPEG4 Network DVR Features & Specifications

- **Fluent & Clear Images for Real Time Surveillance** - The advanced MPEG4 compression format gives clear high quality images
- **Long Recording Hours** - 160Gb can record more than 40 days (4ch, CIF Best Quality, 1 5IPS). No need to worry about changing HDD frequency
- **Multiplex Operation Simultaneously** - Live display, record, playback, backup, and network operations all at the same time
- **Advanced Recording Functions for Different Surveillance Needs** - Supports 5 recording modes: Manual/Timer/Motion/Alarm/Remote recording. Notifies any alarm trigger immediately with pictures sent to a specified E-mail and/or FTP address(s). Automatically records 8MB of video data before any events happened with the Pre-Alarm recording function
- **Full Evidence Capture & Backup Conveniently at Any Time** - Support USB Flash Drive and network remote backup
- **Quick & Easy Recorded Data Search for Playback or Backup** - Easily search the recorded data by Date, Time or Event. Quickly find relevant information in the sea of data
- **Network Remote Surveillance Available, Easy & Convenient** - Allows a live view of the surveillance area anywhere at anytime. Supports remote surveillance for up to 5 users with the licenced software AP and IE Browser
- **Customised Surveillance Area With Motion Detection** - Allows you to focus on all or specific areas with 4 different adjustable, sensitivity factors to consolidate the surveillance. Timely schedule your motion detection recording
- **Hidden Monitoring View Under Covert Recording Mode** - Covert recording that records without showing the live display
- **Friendly Multi-Language on Screen Display** - Easily understand the functions of the device with multi-language on screen display
- **BNC & VGA Video Outputs** - Simple hook-up to a standard CCTV monitor or PC monitor without the need for a VGA converter
