Exhito

Style in technology

Aci Farfisa proudly presents the new monitor Exhito. Modern design and suitable to any indoor place, conceived for who requires the best from an electronic apparatus, without skipping its aesthetics. Thin, therefore discreet, meanwhile strong and durable, Exhito - whose basic version is white color with grey screen frame - allows much possibilities, thanks to the 7 buttons of which one for the auto switch-on, one for door opening and further 5 that allow intercommunicating calls and auxiliary services, for example bell exclusion, depending on the technology used. 4" screen - b/w or LCD - together with audio technology with electronic note guarantee the maximum in video and audio signals reception. The wall bracket is the essential element in Exhito range: different models of wall brackets are available, according to the different system technology, while the monitor model is only one both for the system with reduced number of wires, for the conventional wiring and for the digital system FN4000, too.

MONITOR

EX3160C

Dim (mm): 211 x 218 x 62

White monitor with LCD display of Exhito range for conventional wiring, reduced number of wires and digital FN4000 system, according to the wall bracket used. It is provided with 7 buttons (auto switch-on, door opening and further 5 for additional functions depending on the technology used).

EX3160

Dim (mm): 211 x 218 x 62
